- ✓ Cleanroom produced
- ✓ Less friction since no towel is needed
- ✓ Good for delicate skin
- ✓ Very hygienic
- ✓ Practical on the go
- ✓ Ideal solution for cleansing without water and soap

Product Description

ABENA's Wet Wash Gloves for personal hygiene are a good alternative to the traditional bath with soap and water since they are rinse-free. One package is sufficient for a full-body cleansing. The material is soft and comfortable, making it particularly suitable for cleansing exposed and delicate areas. It contains the perfect amount of soap and water, which makes it suitable for sensitive skin. Also, you have less friction since no towel is needed. ABENA's Wet Wash Glove has hydration and protection properties. It can be used as it is, or the unopened package can be heated in the microwave for added comfort. The glove's embossed surface makes removing impurities and bacteria from the skin easier. It is a moist, two-sided wet wash glove that can be used on the front and back. The wet wash gloves offer a complete grip and control of the clean and unclean side while cleaning the patient. Flipping sides of the product using the same hand without necessarily using or contaminating the other hand is possible. Recommended for use in various situations like incontinence care, in the gym or on a camping holiday when there are limited opportunities for a proper bath.
